

PUBLIC WORKS DEPARTMENT
**IMPORTANT CONSTRUCTION
NOTICE**

2012-2013 Citywide Slurry Seal Program
Contract No. 5320

Dear Resident:

In effort to improve the appearance and to prolong the life of your street pavement, the City of Newport Beach Public Works Department awarded a contract to Roy Allan Slurry Seal, Inc. to slurry seal streets within the Newport Shores and West Newport communities.

The Contractor will start work in your area in approximately 10 days. Please refer to the Location Map on the reverse side. Normal working hours are limited to 8:00 a.m. to 4:30 p.m., Monday through Friday.

This work will necessitate the temporary closure of your street (including driving and parking) to all traffic for a maximum of one day. Temporary access, traffic, and/or parking restrictions at and adjacent to the project locations will be required on days that work is performed. "No Parking, Tow-Away" signs will be posted warning vehicles parked within the posted area will be towed away on work days. The signs will be posted **48-hours in advance** of any crack filling and slurry sealing work adjacent to your property. We request that you observe these restrictions and any other traffic controls in the area. Please make alternate arrangements for parking vehicles you wish to use during the restricted period.

To allow as much on street parking as possible, work thru the community will be phased and street sweeping signs will be bagged on adjacent streets. Street sweeping operations will commence once all slurry seal work for your community is completed.

The City also request that you refrain from watering lawns, washing cars, etc. on the day of the slurry seal operation to allow proper curing. The work will be scheduled such that all streets will be opened to traffic at the end of each day. If inclement weather is encountered, the work will be postponed and you will be re-notified.

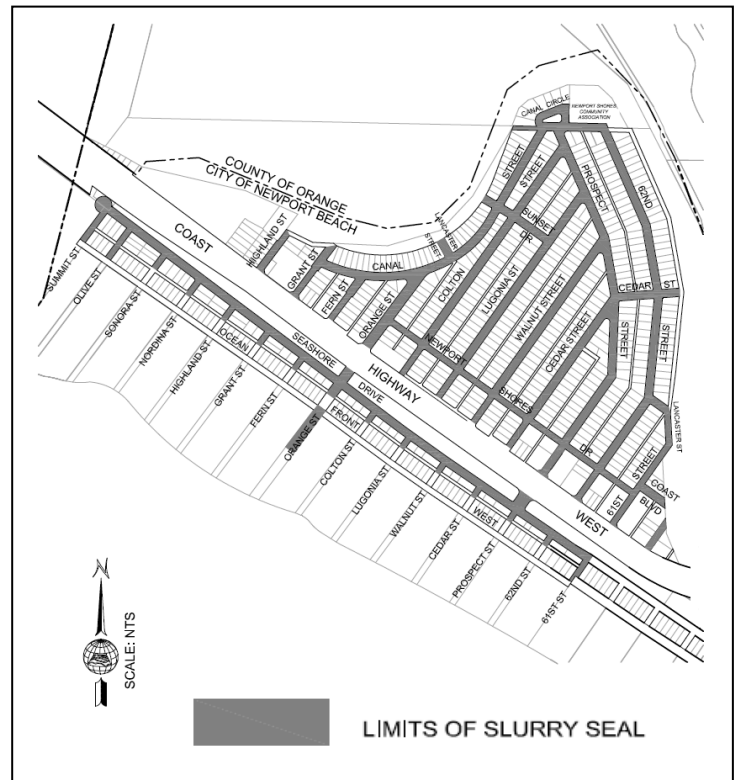

For a few days following slurry seal, please drive at reduced speeds and avoid sharp turning movements to allow the newly sealed surface to "set". Minor scuffing, tire marks and shedding of tiny rock materials are typical on slurry sealed pavement surfaces; however, they will generally diminish and/or disappear with normal roadway traffic.

Exercise caution when driving and/or walking through the construction zones. Most importantly, notify us of any problems so that we can respond accordingly.

In the event your street is to be slurry sealed on a trash pick-up day, please have your trash out by 6:30 a.m.

Your cooperation in making this project successful will be greatly appreciated. Please call Lawrence Allan, Roy Allan Slurry Seal, Inc., at (562) 864-3363. You may also contact Gary Harrison, City Project Inspector, at (714) 878-1492 or Alfred Castanon, City Project Manager, at (949) 644-3314 if you have any questions.

For additional project information including slurry seal schedule, please visit our interactive construction map at www.newportbeachca.gov. Click on Interactive Map then select the link on the Construction Map.
